PROFESSIONAL PROFILE

Infrastructure and Cybersecurity professional with solid experience in the administration, implementation, and optimization of enterprise technology environments. I have developed and maintained LAN and WAN infrastructures, administering Windows and Linux servers, network devices, and security solutions, ensuring operational continuity and service performance.

I have participated in Ethical Hacking, Web Pentesting, Red Team, Security Audit, Hardening, and Vulnerability Management projects, as well as evaluations of Microsoft 365 and Google Workspace environments, applying standards such as CIS Benchmark and PCI DSS.

I am characterized as a highly methodical, responsible person oriented toward continuous improvement. My commitment to constant learning has allowed me to stay up to date with technologies and best practices.

TECHNICAL SKILLS

Network and systems administration: Infrastructure management, local area networks (LAN), Linux/Windows servers, VPN, VLAN, Cisco, Fortinet, and protocols (TCP/IP, DNS, DHCP).

IT Security: Implementation of security policies, access controls, Ethical Hacking, pentesting, scripting with PowerShell, Bash, and Python.

Virtualization and cloud: VMware, Hyper-V, Proxmox, virtualization, Docker, and storage systems.

WORK EXPERIENCE

Cybersecurity Specialist - NIVEL4 CyberSecurity

OCTOBER 2025 – JULY 2026

- Performed offensive security assessments through penetration testing (Web Application Pentesting), Red Team activities, and vulnerability analysis on applications and technology infrastructure.
- Conducted cybersecurity audits based on CIS Benchmark and PCI DSS, assessing the level of compliance in Windows and Linux environments.
- Implemented hardening processes on servers, operating systems, and technology infrastructure to strengthen organizations' security posture.
- Participated in security assessment projects for clients in the financial, healthcare, and retail sectors, adapting recommendations to the requirements of each industry.
- Performed security testing and vulnerability analysis using Kali Linux, Burp Suite, Nessus, and Qualys, generating technical reports with findings and remediation plans.
- Strengthened security controls in Microsoft Intune (Device Compliance, Configuration Profiles, Conditional Access, Autopilot, MDM, and MAM), Microsoft Defender (Defender for Endpoint, Defender for Office, and XDR), as well as Google Cloud Platform (GCP) configurations.
- Audited Identity and Access Management (IAM) controls, including identity management, Least Privilege, MFA, RBAC, and Access Reviews.

- Maintained continuous updating on trends, methodologies, and best practices in Ethical Hacking and offensive cybersecurity, incorporating new security assessment tools and techniques.
- Audited Microsoft 365 and Google Workspace environments, evaluating security configurations, access controls, and compliance with OWASP best practices.
- Led SAST security reviews (Prisma Cloud) and web validations (OWASP v4, CWE, CVSS 4.0) for strategic backoffice, credit, and healthcare projects. In parallel, managed 7 improvement initiatives for internal tools and conducted technical and commercial evaluations of platforms (WildFly, Tomcat) for the secure migration of corporate Java applications.

Support, Web and Network Manager - Club Hípico de Santiago

NOVEMBER 2011 — JULY 2026

- Administered and maintained the infrastructure, ensuring the confidentiality, availability, and integrity of IT services.
- Provided first- and second-level technical support to users, diagnosing and resolving hardware, software, network, and corporate service incidents.
- Administered and optimized institutional web platforms, ensuring their availability, performance, and security.
- Designed, implemented, and monitored LAN/WAN network infrastructure, ensuring high levels of availability.
- Configured, administered, and maintained Linux (RHEL and Ubuntu) and Windows Server servers.
- Implemented and administered virtualization platforms using VMware, Proxmox, and Docker for optimization.
- Managed Synology NAS storage solutions, including backup, recovery, and information availability policies.
- Configured and administered Cisco and Ubiquiti network equipment and Fortigate firewalls, implementing VLAN, QoS, VPN, and security policies.
- Monitored the status of technology infrastructure, identifying risks and executing preventive and corrective actions.
- Implemented cybersecurity measures, server hardening, and access controls to protect infrastructure and information.
- Collaborated on modernization, expansion, and continuous improvement projects for the technology infrastructure, proposing and implementing scalable solutions.
- Prepared documentation and operating procedures for the administration and continuity of IT services.
- Administered platforms and executed the migration of Active Directory from local to On-Premise.
- Managed the company's AWS platform, including web portals and DNS services.

Network Support and Administrator - Seguros Generales Liberty S.A

NOVEMBER 2010 — SEPTEMBER 2011

- Administered and maintained the IT infrastructure, ensuring the confidentiality, availability, and integrity of services through the management of Windows Server, Linux (RHEL and Ubuntu) servers, web platforms, and network infrastructure.
- Administered virtualization platforms using VMware, Proxmox, and Docker, in addition to NAS storage solutions, ensuring the availability, backup, and recovery of information.
- Provided Level 1 and 2 technical support, resolving hardware, software, network, and corporate service incidents, ensuring operational continuity.
- Implemented cybersecurity measures, server hardening, and access controls, monitoring the infrastructure to identify risks and execute preventive and corrective actions.

- Participated in modernization and continuous improvement projects for the technology infrastructure, including the administration and migration of Active Directory, AWS platform management, DNS services, and the implementation of scalable solutions.
- Prepared technical documentation and operating procedures to support the administration, continuity, and standardization of IT services.

Network Administrator and Support Manager - Metalpar S.A
APRIL 2008 — FEBRUARY 2009

- Administered Active Directory, managing users, groups, permissions, and access policies.
- Configured and administered Fortigate firewalls, implementing security rules, VPN, traffic filtering, and access controls.
- Monitored network infrastructure, executing preventive and corrective actions to ensure the availability and continuity of IT services.
- Provided on-site and remote technical support, resolving hardware, software, operating system, connectivity, and corporate application incidents.
- Prepared technical documentation and participated in the management and implementation of technology infrastructure, including equipment inventory, installation, and commissioning.

Network Administrator - Clínica Fundación Médica San Cristóbal
AUGUST 2006 — MARCH 2007

- Led the standardization and modernization project for the corporate network infrastructure under an outsourcing model.
- Designed, implemented, and migrated the network infrastructure, including switches, routers, and firewalls, ensuring the confidentiality, availability, and operational integrity of services.
- Monitored and optimized the performance of the technology infrastructure, executing tests, adjustments, and validations during the migration process.
- Prepared technical documentation and trained internal users to facilitate the administration and operation of the new infrastructure.

EDUCATION

- **Engineering in Cybersecurity, IACC, Santiago** | MARCH 2025 — In progress
- **Engineering in Computer Science, Inacap, Santiago** | MARCH 2019 — DECEMBER 2020

TECHNICAL SPECIALIZATION

- Ethical Hacking Attack Techniques **- Global Solution Consultores S.A.**
- Fundamentals of Hacking with Artificial Intelligence - **8dot8Academy**
- Workshop Participant, Day 5: Red Team and Linux - **Cybersecurity Diploma Program**
- Cybersecurity with AI: Real Risks and Defense Practices - **Chilean Chamber of Artificial Intelligence**
- Blue Team Fundamentals: Cyber Threat Intelligence, Forensics, and Response -**Cybersecurity Diploma Program**
- Foundations of Cybersecurity - **Google**
- Assets, Threats, and Vulnerabilities - **Google**
- Network Analysis Fundamentals - **Cybersecurity Diploma Program**
- Connect and Protect: Networks and Network Security - **Google**

- Tools of the Trade: Linux and SQL - **Google**
- Linux Server Administration and Hardening Techniques – **IT Wall.**
- Server Administration – **IT Wall.**
- Java Programming Techniques – **IT Wall.**
